JACoW Abstract
What's New

JACoW Database
Scientific Program Management System (SPMS)

Matt Arena, Fermi National Accelerator Laboratory

Reclassification

- Administrator assigns experts to topics
- SPMS displays all matching abstracts
- Expert may propose abstracts for another classification
- Privileged reclassifiers accept or reject proposals
- Changes locked out by system parameters

Presentation Type

- Works with the same functionality as reclassification

- Screens combined with reclassification screens (if both options are active)

- Ability to propose any change in presentation type (Invited Oral, Contributed, Poster). Controlled by administrator

Refereeing

- Still on to-do list
- Not needed until FEL05 (late August)
- Based on Ivan's proposal
- Based on existing Editor algorithms
- Some preliminary work complete
  - Dot status options (editor/poster police/referee)
  - OK to publish function

Personal Schedule

- Incorporated into search routine
- Add to schedule link
- Printable report by day
- Rudimentary conflict notification

- Current status of all jobs
- Ability to kill a job
- Restart all non-running jobs
- Part of installation routine
- Performs the initial full SYNC and sends email when complete
- Controlled by SPMS table data
