

**Collective Effects at ELETTRA,**  
C.J. BOCCHETTA, A. FABRIS, F. IAZZOURENE,  
E. KARANTZOULIS, M. SVANDRLIK, L. TOSI,  
R.P. WALKER, Sincrotrone Trieste; A. WRULICH,  
SLS - Observation and analysis of various collective effects  
at ELETTRA are presented under various operating  
conditions. In particular transverse effects while in  
multibunch mode and in the absence of longitudinal  
instabilities are discussed. Results of recent measurements  
of the ring impedance are shown and a comparison made  
with early measurements.
