The screenshot shows the EPAC'08 website interface. The header includes the EPAC'08 logo, the title "11th European Particle Accelerator Conference", and the location and dates "Magazzini del cotone, Genoa, Italy / June 23-27, 2008". Logos for Elettra, INFN, and EPS are also present. The left sidebar contains a "General" menu with links to Welcome, Venue, Dates, Registration, Committees, Poster, Special Meetings, Accelerator Prizes (2008 Winners), Photos, Internet Access, Sponsors, and Contacts. Below this is a "Related Conferences" section. The main content area features a "Welcome from the Chair" message from Caterina Biscari, INFN-LNF, Chair of the EPS-AG Elected Board and Chair of the EPAC'08 OC. The message includes a welcome to the conference, a brief history of Genoa, and information about the conference venue and program. A footer note mentions that the website provides delegates with information on the scientific program, registration, accommodation, social activities, and excursions, and that persons intending to participate should take note of the deadlines for the call for papers.

Welcome from the Chair con il patrocinio del Comune di Genova

On behalf of the European Physical Society Accelerator Group (EPS-AG), which forms the core of the Organizing Committee (OC) of the EPAC series of conferences, I am pleased to announce the 11th biennial European Particle Accelerator Conference, EPAC'08, to be held in Genoa, Italy, from 23 to 27 June 2008.

Genoa overlooks the Mediterranean sea. Its history has been moulded by the sea presence, giving birth to navigators, discoverers, artists. The Conference poster reflects Genoa international vocation: Cristoforo Colombo, from whose voyage Europe became aware of America's existence, was born in Genoa. Marco Polo, who opened the European roads to Asian countries, wrote his travel book, Il Milione, in his forced Genoa sojourn.

The Magazzini del Cotone Venue, hosting the Conference, provides delegates with a modern environment for attending oral sessions, for fruitful scientific discussions during the poster sessions, for connecting with the industrial exhibitors, and for relaxing looking out from the high windows over the sea.

I look forward to greeting you at EPAC'08.

Caterina Biscari, INFN-LNF
Chair of the EPS-AG Elected Board
Chair of the EPAC'08 OC

The Conference Website provides delegates with information concerning the scientific programme as well as registration, accommodation, social activities and excursions. Persons intending to participate should take careful note of the deadlines for the call
